## Building Your Laboratory

### Step by Step

*"From the smallest to the largest, Laboratories are what we do!"*

## Getting Started

Building and starting a laboratory can be overwhelming. There are a number of laws regarding compliance along with many logistical challenges. One wrong move or missed detail can derail your startup for months. Unfortunately, there are very few resources that provide startup instructions.

Hankins Consulting Group specializes in lab design, buildout, and licensure. We provide a large array of services to simplify the process. From CLIA application assistance to turn-key all-inclusive buildouts. The professionals at Hankins Consulting Group will create a customized project plan to ensure no detail is missed. We provide precise and detailed planning from conception to completion allowing your lab buildout to run smoothly without the common pitfalls and setbacks.

## Buildout and Design

Our team will put their experience and expertise to work to design a laboratory with optimal workflow and maximum efficiency.

*"Hankins Consulting Group did an amazing job building, licensing and staffing our new lab. We give them the highest marks."*

.....Carepath DX

## Equipment and Supplies

Hankins Consulting Group has helped many new labs over the years meet current state and federal regulations. While there are obvious requirements, each lab is also unique. We will work closely with you to determine what equipment, reagents, and supplies your lab may need. Our job is to help you make sound decisions about your lab without unnecessary expenses.

## Setup and Validation

Properly setting up and validating all equipment is an important step to ensure you are in compliance with good laboratory practices and regulations. The documentation for validation and licensing can be a daunting process. We are able to assist you and offer insight on what is right for your lab size and specialty.

## SOP Writing

Hankins Consulting Group will help you write and implement the policies and procedures for operating your lab.

## Consider This...

Many clients have contacted Hankins Consulting Group after they have already begun the process of planning their lab. A project that requires re-work can cost more than planned while hiring a knowledgeable consultant from the start can save you considerable cost.
